Setuid c-code

Sometimes you need setuid code. Here is a great snippet for it.

https://gist.github.com/jblyberg/3899599

```c
#include <unistd.h>
#include <errno.h>

main( int argc, char ** argv, char ** envp )
{
            if( setgid(getegid()) ) perror( "setgid" );
            if( setuid(geteuid()) ) perror( "setuid" );
            envp = 0; /* blocks IFS attack on non-bash shells */
            system( "/path/to/bash/script", argv, envp );
            perror( argv[0] );
            return errno;
}
```
